Adventures In Diving

*PADI Adventure Diver
PADI Advanced Open Water Diver*

Want to take your diving to the next level?

Whether you just received your PADI Open Water certification or have hundreds of logged dives, PADI's **Adventures in Diving** program gives you the confidence, skills and experience to take your diving to new levels of excitement!

It's quick and easy for you to make the next move. To get your **PADI Adventure Diver** certification, begin by going over course materials in the comfort of home. Then meet with your instructor for a brief review and complete, in as little as one day, any three adventure dives from the list on the right.

It's that simple!

New experiences, new skills – lots of diving – thrilling adventures!

But don't stop there.

Your completed dives can be credited towards the **PADI Advanced Open Water Diver** certification. Make two more adventure dives, for a total of five – two of which must be deep and navigation – from the list on the right, to become an Advanced Open Water Diver.

Wait, there's more!

Your completed adventure dives may be credited towards the first dive of a related **PADI Specialty** program. What a quick and simple way to gain more diving knowledge while exposing yourself to new diving experiences.

Plus...

Earn five PADI Specialty ratings and complete the PADI Rescue Diver program, and you'll be worthy of the most illustrious recreational diver rating – **PADI Master Scuba Diver** – the highest recreational level in diving.

For more information, contact your local PADI Dive Center or Resort or visit www.padi.com.

Your choices are many!
