Introducing the **EVOLUTION** Closed Circuit Rebreather from Ambient Pressure Diving.

The **EVOLUTION** follows the pioneering steps of the **INSPIRATION** - the planet's most widely used Closed Circuit Rebreather - fulfilling the potential to bring all the **advantages of Constant PO₂ diving** to the world of the sport diver.

Hugely Increased No-Stop Times • Greatly Reduced Deco
Dramatically Decreased Gas Consumption • Supreme Versatility

The Evolution offers all the advantages of Nitrox but without the hassles of pre-planning, pre-mixing, excessive cylinder carrying or gas-switching during the dive.

innovate

Weighing just 20kg with 2 x 2 litre onboard cylinders and a 2kg Sofnolime CO₂ scrubber, the Evolution is compact, light and a breeze to dive with. In addition to its superbly manageable proportions, the Evolution is packed with state-of-the-art, technologically advanced new features:

- **Single Multi-function wrist-mounted Primary Display** with advanced easy-read graphics and low profile, maintenance free switches
- **Master & Slave O₂ Controllers** with independent power supplies
- **HUD - Head Up Display** with Green/Red LED indicators for both controllers

HUD

Primary Display

ADV and Flow-Stop

- **CO₂ Scrubber Life Gauge** with graphical display on handset
- **Battery Status Indicator** with graphical display on handset
- **Real Time Dive Memory** (plus PC link*)

*PC downloadable information includes electronic dive log facility and recorded data such as: real-time display of all 3 cell readings, PO₂ switches, scrubber probe temperatures, any cell errors or warnings, depth/time profile and surface interval and includes the option of manual input of info, such as, tank pressures, dive conditions and any other details you want to record.

evolve...

Incredibly, all of the above comes as standard. The Evolution also has a wealth of very desirable optional upgrades:

- **Decoware** upgrades to the onboard electronics - from basic dive gauge to multi-gas dive computer - displayed on the handset (*under development - expected 2004*)
- **Full-Face Mask** with an **Open Circuit Switch Mouthpiece** and optional plug-in **Diver2Diver & Surface Comms** (*under development - expected 2004*)
- **ADV - Auto Diluent-addition Valve** (*available now*)
- **Gas Connection & Flow-Stop Systems** (*available now*)

The Evolution is offered in a variety of colour schemes and you have a choice of a 16kg Wing or Jacket style BCD with integrated weights.
